FERC-549D, [Quarterly Transportation and Storage Report for Interstate Gas and Hinshaw Pipelines]

OMB Control No.: 1902-0253

Abstract: The reporting requirements under FERC-549D are required to carry out the Commission's policies in accordance with the general authority in Sections 1(c) of the Natural Gas Act (NGA)² and Sections 311 of the Natural Gas Policy Act of 1978 (NGPA)³. This collection promotes transparency by collecting and making available intrastate and Hinshaw pipeline transactional information. The Commission collects the data upon a standardized form with all requirements outlined in 18 CFR 284.126.

The FERC Form 549D collects the following information:

- Type of service performed for each transaction;
- The rate charged under each transaction;
- The primary receipt and delivery points for the transaction, specifying the rate schedule/name of service and docket were approved;
- The quantity of natural gas the shipper is entitled to transport, store, and deliver for each transaction;
- The term of the transaction, specifying the beginning and ending month and year of current agreement;
- Total volumes transported, stored, injected or withdrawn for the shipper; and

² 15 USC 717-817-w

³ 15 USC 3301-3432

Filers submit the Form-549D on a quarterly basis.

Access to the FERC-549D Information Collection Materials: A copy of the current form and related materials can be found at <http://www.ferc.gov/docs-filing/forms.asp#549d>, but will not be included in the Federal Register. The Commission will not publish these materials in the Federal Register.

Type of Respondent: Intrastate natural gas and Hinshaw pipelines.

Estimate of Annual Burden: The Commission estimates the annual public reporting burden for the information collection as:

OMB Control No.: 1902-0271

Abstract: Section 1252(e)(3) of the Energy Policy Act of 2005,⁵ requires the Federal Energy Regulatory Commission (FERC or Commission) to prepare and publish an annual report, by appropriate region, that assesses demand response resources, including those available from all consumer classes. Specifically, EAct 2005 Section 1252(e)(3) requires that the Commission identify and review:

- (A) saturation and penetration rate of advanced meters and communications technologies, devices and systems;
- (B) existing demand response programs and time-based rate programs;
- (C) the annual resource contribution of demand resources;
- (D) the potential for demand response as a quantifiable, reliable resource for regional planning purposes;
- (E) steps taken to ensure that, in regional transmission planning and operations, demand resources are provided equitable treatment as a quantifiable, reliable resource relative to the resource obligations of any load-serving entity, transmission provider, or transmitting party; and
- (F) regulatory barriers to improved customer participation in demand response, peak reduction and critical period pricing programs.

Type of Respondent: Persons interested in the above topics.

Estimate of Annual Burden: The Commission estimates the annual public reporting burden for the information collection as:

Secretary.

⁶ The estimates for cost per response are derived using the 2016 FERC average salary plus benefits of \$154,647/year (or \$74.50/hour). Commission staff finds that the work done for this information collection is typically done by wage categories similar to those at FERC.
